

TRAVELMATE-AMBER

LED beacon Beacon | LED | amber | magnetic | battery operated

The Travelmate is a portable, autonomous flashing light that can be used anywhere. Once charged, you can count on a very powerful flash signal for up to eight hours. The strong magnet in combination with the suction cups ensure a very good adhesion. Proof of this is the official approval by Dekra for use up to 200 km/hour. The additional carrying case provides space for the flashlight and the 12 and 230 volt chargers. So never go on the road without 1 or more Tarvelmates. You can always bring yourself and others to safety when needed.

Dekra certified up to 200 km/h, report 201948385

Specifications

Color	Amber
Operating voltage	N/A
Mounting	Magnetic
Operation temperature	-20°C + 50°C
Light source	LED
Synchronisable	No
Number of flash patterns	11
Run time	6-8 hours
Lumen	370
Watt	6,40 Watt
Material	Polycarbonate
Magnet type	Neodymium
Battery	Yes
Battery type	Lithium, built-in, battery pack replaceable
Diameter mm	126 mm
Height mm	100 mm
ECE R65 Class 1	Yes
EMC R10	Yes
EMC	EMC R10
IP-degree	IP65

TRAVELMATE-AMBER

LED beacon Beacon | LED | amber | magnetic | battery operated

Supplied with	12 VDC & 230 VAC charger
Packed per	1
Packing	Handy, black carrying pouch with separate compartment for the 12V and 230V chargers.
EAN	5414184000926
Weight (kg)	0,900 Kg
